

China, India, Arabia.

A new silk route?

Dubai has successfully positioned itself as a gateway to South West Asia; a region with considerable resources, a young population, and a strong link to the overall Asia story. Gulf Cooperation Council economies have doubled in size since 2000. With oil demand likely to remain strong, these economies will continue to witness considerable growth. Future plans include spending over \$1 trillion on infrastructure and other economic sectors. SHUAA Capital has been investing in the GCC since 1979 from Dubai, and now with the Dubai Strategic Plan 2015, we see even greater opportunities arising.
