#### Comments

Adjusted operating income is AED 5.5 million favouarable compared to the previous year, after normalizing for one-off revenues of AED 35 million mainly from legacy real estate investments in the prior year.

- Revenues were AED 13 million lower after normalizing for prior year one-off revnues, primarily due to a decrease in management fees from private market funds.
- This decline was offset by AED 18 million of lower expenses in H1 2024, resulting from cost optimization measures implemented in 2023 and sustained through H1 2024.

Adjusted net operating income declined by AED 11 million quarterover-quarter, driven by a 34% decrease in revenues.

 Revenues were AED 10 million lower than the previous quarter, primarily due to reduced performance fees from the ICC fund and a decline in trading income resulting from lower trading volumes and capital.

Balance sheet optimization continued in H1 2024, with impairments recognized to write-off legacy investments.

- Steps were taken to right-size the balance sheet, including the write-off of legacy real estate investments and the subsequent write-back of legacy liabilities, in order to achieve a leaner and more efficient capital structure.
- Management remains focused on deleveraging the balance sheet, and the agreement reached with bondholders will further support debt reduction and strengthen the company's equity base.
